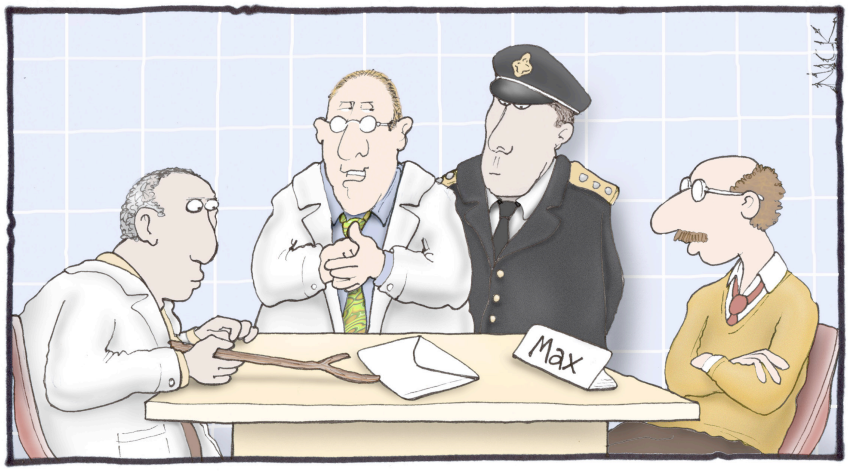
Organic Chemistry I

Exam 03

17 November 2006

KEY



"In this laboratory we're always pushing the envelope to the Max."

Please read through each question carefully and answer in the spaces provided.

A good strategy is to go through the test and answer all the questions you can do easily. Then go back and tackle the more difficult problems.

Please make sure your structures are drawn clearly and indicate any necessary stereochemistry with bold or dashed bonds.

Finally, think about what you know. Reason and common sense can often help you out.

You may use the back of the pages for scratch paper.
