[Answer Key Only](#)

Organic Chemistry 2444-01

September 24, 2008

EXAM ONE

[Need a Periodic Table? Click here.](#)

1. (8 pts) Give the complete mechanism for the following reaction.

[ANSWER](#)

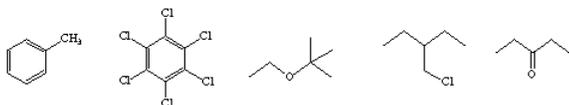

2. (12 pts) In each case circle the correct answer(s).
-1/2 for each extra answer.

(a) Circle all structures that are consistent with a mass spectrum having a P-35 peak.

[ANSWER](#)

(b) Circle all molecules expected to show at least one a singlet proton NMR.

[ANSWER](#)

(c) Circle the molecule used as the zero point in the proton NMR.

$\text{CH}_3\text{CH}_2\text{OH}$ KBr $(\text{CH}_3)_4\text{Si}$ THF $\text{CH}_3\text{CH}_2\text{OCH}_2\text{CH}_3$

[ANSWER](#)

(d) Circle the most stable carbocation.

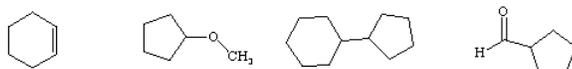

[ANSWER](#)

(e) Circle all reagents that convert 2-pentanol to 2-bromopentane..

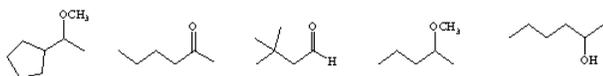

SOCl_2 PBr_3 POCl_3 HBr KBr

[ANSWER](#)

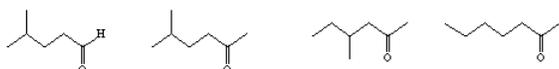

(f) Circle all molecules that exhibit magnetic anisotropy in the proton NMR.

ANSWER

- (g) A molecule with a formula $C_6H_{12}O$ shows a strong peak at 1725 cm^{-1} and no peak at $3300\text{--}3600\text{ cm}^{-1}$.
Circle all possible structures that are consistent with this data.

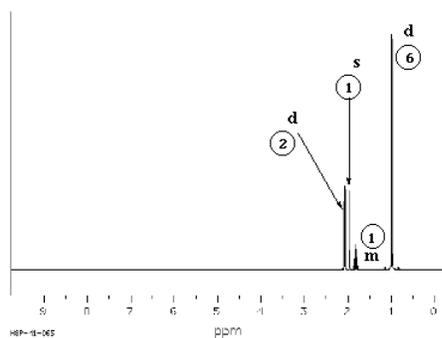

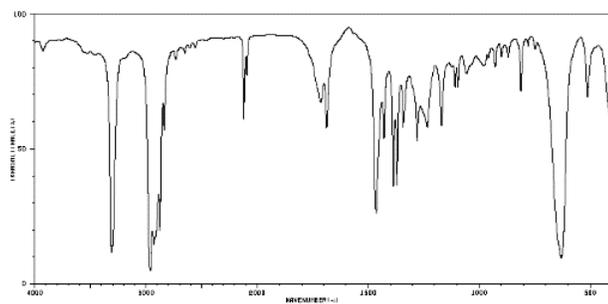

ANSWER

- (h) Circle all molecules that react with 1. NaBH_4 ii. aq NH_4Cl to give 4-methyl-2-hexanol.

ANSWER

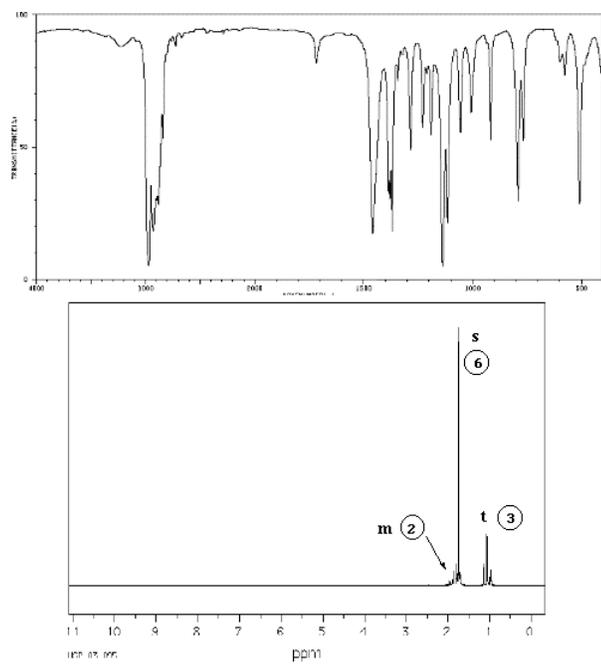

3. (15 pts) Given the following spectral data, what is the structure of this molecule? SHOW YOUR WORK.

P (82) (100) P+1 (83) (6.66) P+2 (84) (0.22)

ANSWER

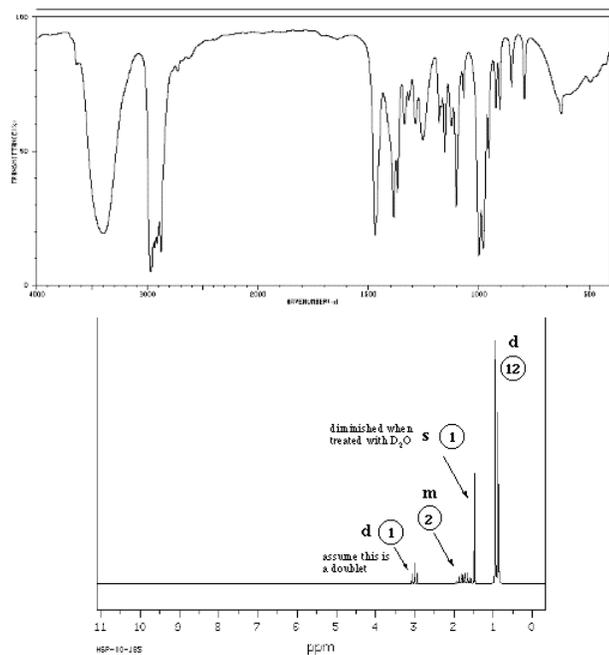

4. (15 pts) Given the following spectral data, what is the structure of this molecule? SHOW YOUR WORK.

P (150) (100) P+1 (151) (5.55) P+2 (152) (98)

**ANSWER**

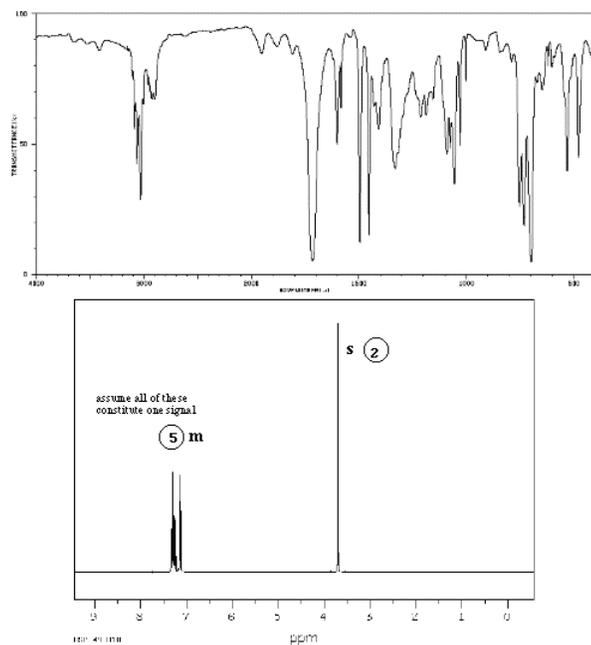

5. (15 pts) Given the following spectral data, what is the structure of this molecule? SHOW YOUR WORK.

P (116) (100) P+1 (117) (7.77) P+2 (118) (0.50)

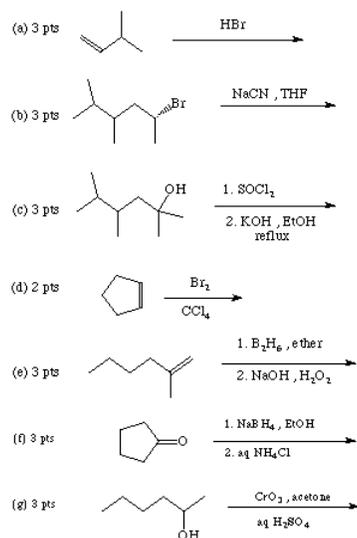

**ANSWER**

6. (15 pts) Given the following spectral data, what is the structure of this molecule? SHOW YOUR WORK.

P (210) (100) P+1 (211) (16.65) P+2 (212) (1.59)

**ANSWER**

7. (20 pts). In each reaction give the major product. If there is no reaction, indicate that with N.R. Remember stereochemistry where it is appropriate.

**ANSWER**

P+1 = (1.11) (#C) + 0.38 (#N)	P+2 = [1.11 x #C]/200 + 0.20 (#O)	rings or pi-bonds(no N) = 2#C+2-#H-#X/2	rings or pi bonds (
InfraRed			
Functional Group	v (μ)	Functional Group	v (μ)
C-H	alkanes		
	2850-2960 (3.38-3.51)
